

Azure cloud Engineer / DevOps Engineer

Alexander Jerry

Bethel, CT

alexpriestj@yahoo.com 6032043692 | www.linkedin.com/in/alexander-jerry-3991a534

PROFESSIONAL SUMMARY

Azure DevOps and Azure cloud engineer with 6+ years of experience designing, implementing, and supporting CI/CD platforms on Microsoft Azure. Strong expertise in Azure DevOps Services (Repos, Pipelines, Artifacts), YAML multi-stage pipelines, Terraform-based Infrastructure-as-Code, and Azure Kubernetes Service (AKS), Migration from on premise to cloud. Linux and Windows operating systems, and SQL platforms. Strong background in Azure infrastructure operations, OS administration, virtualization, monitoring, backup, and incident response. Proven success migrating 15+ applications to Azure, improving deployment reliability to 99%, reducing cloud costs by 28%, and standardizing DevOps and GitOps practices across multi-team environments. Experienced in DevSecOps, FinOps, cloud governance, and automation at enterprise scale.

CORE SKILLS

Cloud & Azure Services:

Microsoft Azure, Azure Virtual Machines, Azure Networking (VNet, NSG), Azure Storage, App Services, Azure Kubernetes Service (AKS), Azure Monitor, Application Insights, Azure Key Vault, SQL migration.

Azure DevOps Platform:

Azure DevOps Services, Azure DevOps Pipelines, Azure DevOps Repos, Azure DevOps Artifacts, Azure DevOps Boards, YAML Pipelines, Multi-stage Pipelines, Pipeline Templates, Service Connections, Variable Groups, Environments, Approval Gates, Self-Hosted Agents, Microsoft-Hosted Agents

Infrastructure as Code & Automation:

Terraform (modules, state, remote backend), ARM Templates, Bicep, Ansible, PowerShell, PowerShell DSC

Containers & GitOps:

Docker, Kubernetes, Helm, FluxCD, ArgoCD, GitOps

CI/CD & DevSecOps:

Continuous Integration, Continuous Deployment, SonarQube, Dependency Scanning, Key Vault, Synk, Blue-Green Deployment, Canary Deployment

Monitoring & Observability:

Azure Monitor, Application Insights, Datadog, Stackify, ServiceNow

Scripting & Languages:

PowerShell, Bash, Python, C#, .NET

Practices & Methodologies:

DevOps, DevSecOps, Azure Cloud, High Availability, Disaster Recovery, Cloud Governance, Agile, Scrum

Windows / Linux Servers: Administration, Entra ID, Permissions, Management, version updates.

ADF/Databricks: Administration, Users permission, Troubleshooting pipelines

EDUCATION

- Bachelor of Science – Information Technology Management
Western Governors University | 2014 – 2019

PROFESSIONAL EXPERIENCE

Senior Azure DevOps Engineer / Azure cloud Engineer**Questel – Virginia**

Jul 2022 – Nov 2025

- Led Azure DevOps platform design and standardization across multiple engineering teams, establishing reusable YAML pipeline templates and GitOps workflows.
- Architected and executed migration of 15+ applications to Microsoft Azure using Terraform, ARM, and Bicep, implementing high-availability and disaster recovery designs.
- Supported virtual machines, Azure compute resources, and Hyper-V-based workloads, ensuring system reliability and capacity planning.
- Provided SQL Server and relational database platform support, including installation validation, backup/restore processes, and operational monitoring.
- Improved CI/CD deployment reliability from 60% to 99% by redesigning Azure DevOps multi-stage pipelines with approvals, validations, and rollback strategies.
- Reduced Azure cloud costs by 28% through FinOps initiatives, automation, and resource optimization.
- Managed Azure disaster recovery efforts by using Azure site recovery tool.
- Managed Azure Kubernetes Service (AKS) clusters supporting 25+ microservices, implementing autoscaling and reducing operational overhead by 40%.
- Implemented Infrastructure-as-Code using Terraform and GitOps tools (FluxCD, ArgoCD), reducing environment provisioning time by 65%.
- Integrated Azure Monitor and Application Insights for centralized logging, metrics, and alerting across applications and Kubernetes workloads.
- Partnered with developers, security, and architecture teams to enforce DevSecOps standards, branching strategies, and CI/CD governance.

Azure DevOps Engineer (Contract)

Orion Advisors – Omaha, NE

Feb 2022 – May 2022

- Designed multi-cloud Infrastructure-as-Code solutions using Terraform across Azure and AWS, reducing configuration complexity by 50%.
- Built and optimized Azure DevOps and GitHub CI/CD pipelines with automated deployments and security scanning.
- Supported daily operations of Azure cloud infrastructure, including virtual machines, networking, storage, and security configurations.
- Assisted with SQL platform administration, database backup coordination, and performance monitoring, SQL server database migration.
- Implemented Datadog monitoring and alerting to improve system visibility and incident response.
- Collaborated with IS team, engineering, QA, and security teams on DevOps documentation and deployment standards.
- Created and administered ADF and Databricks resources.

Azure DevOps Engineer / Cloud Engineer

Southern New Hampshire University – New Hampshire

Feb 2021 – Dec 2021

- Built and maintained Azure DevOps CI/CD pipelines for 8+ applications, achieving a 98% deployment success rate.
- Standardized branching strategies, pull request policies, and release workflows.
- Managed pre-production environments using Infrastructure-as-Code to eliminate configuration drift.
- Automated release and deployment processes, reducing manual effort and deployment errors.
- Assisted with Linux and Windows server administration, system updates, and troubleshooting.
- Created runbooks and operational documentation to support consistent system operations and issue resolution.
-

DevOps Engineer Intern

Katerra – California

Dec 2019 – Nov 2020

- Automated AWS infrastructure provisioning using Terraform and Ansible, reducing manual provisioning effort by 80%.
- Developed standardized Dockerfile templates for microservices.
- Built CI/CD pipelines with automated testing and artifact management.
- Assisted with Apache-based application environments and containerized workloads.
- Supported infrastructure automation initiatives to reduce manual configuration effort
-

CERTIFICATIONS

Microsoft Azure Administrator Associate (AZ-104)
